

Founded in 2014, Tamworth History Group was formed when regular researchers in Tamworth Library were offered the chance to meet monthly in one of their meeting rooms. Within months this had blossomed and was soon attracting double figures. When the group began bringing in local speakers to inform and entertain, the word spread and now forty people enjoy the regular monthly meetings.

Still primarily a research group, their work culminated in a publication entitled *A Walk into Market Street*, which looks at more than five centuries of the history of this iconic Tamworth thoroughfare. The group are continuing their investigations, with news on future talks and research projects to follow.
